

THE MOST SERIOUS FINANCIAL SCANDAL OF MODERN TIMES

1. SUMMARY & OVERVIEW

- Over the next month and a half, we will issue more than thirty daily press releases, which will outline the most serious financial scandal of modern times.
- We will be describing all aspects of the extensive criminality undertaken by the leading UK bank, Lloyds and worse still, its comprehensive cover up by Government, regulators and prosecuting authorities.
- Every arm of the state, which should protect its citizens and prevent such wrongdoing, has been engaged in the cover up and banks such as Lloyds have been treated as being above the law.
- When the public finds out how the rule of law has been so widely corrupted and abused, it will further undermine trust in Government and the Establishment.
- The coronavirus pandemic has severely challenged our Government, like many others. However, this scandal will shake the foundations of our democracy and relegate the current Government to the status of a lame duck administration for the remainder of the Parliament.
- More importantly, it will bring disgrace on our country and lower its international standing. No country, which claims to uphold high standards of conduct, can behave like this.
- Senior figures have called for comprehensive clean up and reform but so far, these requests have been ignored. In Australia, there has been a Royal Commission but the UK Government has preferred to cover everything up.
- If this scandal derails arrangements currently being negotiated with the EU for access of the City of London to European financial markets, this will be the price which has to be paid for serious high-level misconduct.
- We are obliged to describe every aspect of the scandal to a wide national and international audience, for it seems that the only way now to persuade Government and banks to behave correctly is to shame them publicly.

We very much regret that matters have deteriorated to this point.
